

Project Initialization and Planning Phase

Date	5-oct-2026
Team ID	xxxxxxx
Project Name	India's Agricultural Crop Production Analysis
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Complete PS-1

I am an agricultural data analyst/researcher who needs to understand agricultural crop production across different states in India. I'm trying to compare crop production across different Indian states and identify which states have higher or lower production. But the agricultural data is available in a large Excel dataset, making it difficult to quickly compare and interpret the information manually. Because the data contains production information for multiple states, crops, years, and seasons. Which makes me feel that finding meaningful state-wise production patterns and insights is time-consuming.

Complete PS-2

I am a user who wants to understand agricultural production trends and patterns from historical data. I'm trying to analyze how crop production changes across years and seasons and compare production among different crops. But it is difficult to identify these trends and relationships directly from raw tabular data. Because the dataset contains a large number of records covering different crops, states, years, and agricultural seasons. Which makes me feel that extracting useful insights and presenting the findings clearly is difficult without interactive visualizations.

I'm trying to	or "job" the customer is trying to achieve - what are they trying to achieve?	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way - what bothers them most?	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problems or barriers exist - what needs to be solved?	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view - how does it impact them emotionally?	Describe the emotions the result from experiencing the problems or barriers
