Project Title	India's Agricultural Crop Production Analysis
Maximum Marks	2 Marks

Data Collection Plan & Raw Data Sources Identification Template

Elevate your data strategy with the Data Collection plan and the Raw Data Sources report, ensuring meticulous data curation and integrity for informed decision-making in every analysis and decision-making endeavor.

Data Collection Plan Template

Section	Description
Project Overview	The project focuses on analyzing India's agricultural crop production data using Tableau. The objective is to transform agricultural data into meaningful visual insights by analyzing production across different states, crops, years, and seasons. The prepared data will be used to create interactive visualizations, KPI cards, dashboards, and a Tableau Story.
Data Collection Plan	The agricultural crop production dataset was collected from Kaggle and used in Excel format. The dataset was reviewed and prepared for analysis before connecting it to Tableau. The collected data contains information related to agricultural production across different states, crops, years, and seasons. The prepared dataset is then connected to Tableau for visualization and dashboard development.

Raw Data Sources Identified	The primary raw data source identified for this project is a Kaggle agricultural crop production dataset. The dataset was downloaded and maintained in Excel format and used as the source for Tableau analysis. The data provides the required information for analyzing crop production by state, crop, year, and season.
