

Dashboard Design

Date	5 October 2026
Team ID	PNT2022TMIDxxxxxx
Project Name	India's Agricultural Crop Production Analysis
Maximum Marks	5 Marks

Creating an effective dashboard involves thoughtful design to ensure that the presented information is clear, relevant, and easily understandable for the intended audience. Here are some key principles and best practices for dashboard design

Activity 1: Interactive and visually appealing dashboards

Creating interactive and visually appealing dashboards involves a combination of thoughtful design, effective use of visual elements, and the incorporation of interactive features. Here are some tips to help you design dashboards that are both visually appealing and engaging for users so take care of below points

- Clear and Intuitive Layout
- Use Appropriate Visualizations
- Colour and Theming
- Interactive Filters and Slicers
- Drill-Down Capabilities
- Responsive Design
- Custom Visuals and Icons
- Use of Infographics

Note: Highlight the major outcomes in form of bullet points

Sample:

Here are potential outcomes from the dashboard image provided:

State-wise Production Analysis: The dashboard allows comparison of agricultural production across different Indian states and helps identify higher- and lower-producing states.

- **Crop-wise Production Analysis:** The crop visualization helps identify crops with higher production and compare production levels among different crops.
- **Year-wise Production Trend:** The year-wise line chart helps understand how agricultural production changes over time and identify production trends.
- **Season-wise Production Analysis:** The season-wise visualization helps compare production across different agricultural seasons.
- **Geographical Production Analysis:** The state production map provides a geographical view of agricultural production across India.
- **Interactive Analysis:** State, Crop, Year, and Season filters allow users to interactively explore the dataset and obtain focused insights.
- **Overall Production Summary:** KPI cards provide a quick summary of important production metrics from the dataset.

Activity 2

Publish Dashboard on Tableau Public and Paste the Dashboard Public link below:
